

Microsoft Teams

Direct routing

Microsoft Teams

Enhanced with phone system integration

- ✓ Integration of Teams infrastructure into existing on-premise telephony system
- ✓ Call costs on existing negotiated phone contact
- ✓ No additional trunks or number ranges
- ✓ Integrate audio conferencing dial in
- ✓ Extend Teams meeting to included phone participants
- ✓ Reduce desk phone while keeping existing contact numbers
- ✓ Microsoft approved & certified solution
- ✓ Secure communication using TLS

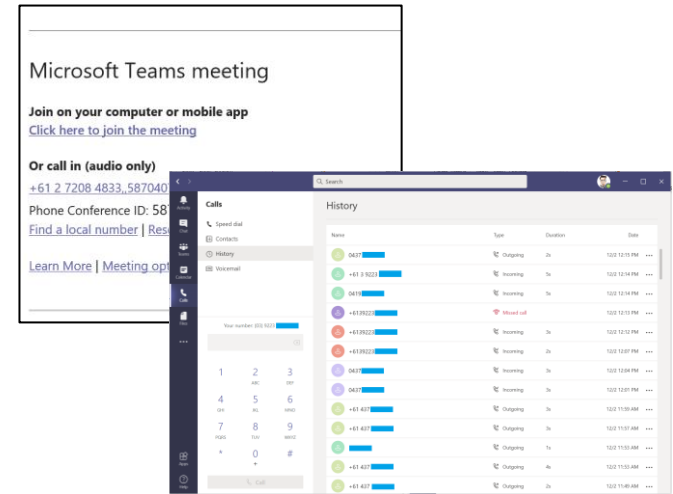

*) will be released at a later time (see note at end of the document)

Microsoft Teams

Enhanced with phone system integration

- ✓ Teams users are enabled to use on-premises SIP trunks to make and receive calls instead of using Microsoft Carrier Services via Calling Plans.
- ✓ Costs are significantly reduced with Direct Routing in comparison to Microsoft's Cloud Voice.
- ✓ Teams client users can make and receive calls from SIP phones registered to IP-PBX.
- ✓ Enabling Teams users to have IP-PBX functionality including calls, voicemail, hunt group with Teams enhancement of integrated outlook contacts.

Thank you!
